IkonPRO twilight detector IP67
71554

saxby lighting

71554

Add extra functionality to the IkonPRO with our new twilight detector. The photocell will turn the IkonPRO kit on when the ambient light drops below a certain level and will turn it off as the light increases. It is simple to connect in-line with the single colour or the CCT IkonPRO kits. Please note this accessory doesn't support the RGB kits.
Complete with built in Photocell
30 lux off, 30 lux on
Polished stainless steel & opal pc
Constructed from stainless steel (304) & polycarbonate
Shipment Carton Qty: 36
