

92246

DALI Series (with PUSH Dim) Flicker-Free LED Power Supply

Product Feature

- Max. 44W
- Constant current output. The current value can be selected via a DIP switch, 50mA every step.
- Metal housing. Compatible with the Class I and Class II light fixtures
- Built-in active power factor correction function
- Stand-by power consumption <0.5W
- DALI dimming (Logarithmic dimming curve, linear dimming curve and push dimming functions are optional.)
- Warranty: 2 years + 3 years extended warranty

Technical Data

Output	Output Voltage	25-42V					
	Output Current	The output current is selectable via a DIP switch. Refer to the DIP switch table.					
		800mA	850mA	900mA	950mA	1000mA	1050mA
	Ripple Voltage	<2V @ 50Hz					
	Percent Flicker	<0.5% @ 50Hz, 230Vac					
	Current Tolerance	±5%					
	Temperature Drift	±10%					
	Line Regulation	±5%					
Start-up Time	<1s @ 230VAC						
Input	Line Regulation	±5%					
	Input Voltage	220-240VAC (voltage limit: 200-264VAC)					
	Input Frequency	50 / 60Hz					
	Input Current	0.3A Max.					
	Power Factor	≥0.9 @ 230VAC, 1050mA, LED load, DC42V					
	THD	≤15%					
	Efficiency	≥88%/230VAC, 1050mA, LED load, DC42V					
	Inrush Current	≤80A @ 350uS @ 230VAC (Max.)					
	Standby Power Consumption	≤0.5W (when DALI's OFF signal takes into effect)					

Protective Feature	Open-Circuit Protection	<55V
	Short-Circuit Protection	Hiccup mode (auto-recovery)
Environment Condition	Working Temperature	-35°C ~ +50°C
	Working Humidity	20-90%RH (no condensation)
	Storage Temperature/Humidity	-35°C ~ 80°C (six months under class I environment); 10-90%RH (no condensation)
	Atmospheric Pressure	86-106KPa
Safety & Norm	Withstand Voltage	I/P-O/P: 3.75KV, 5mA, 60s
	Insulation Resistance	I/P-O/P: 500VDC, >100MΩ
	Surge Rating	IEC61000-4-5 (L-N: 1KV; L-PE:2KV; N-PE: 2KV)
	Safety Standard	EN61347, GB19510
	Electromagnetic Interference	EN55015, EN61000-3-2
	Electromagnetic Susceptibility	EN61000-4-2, 3, 4, 5, 6, 8, 11; EN61547
Others	IP Rating	IP20
	Warranty Condition	T _c ≤68 °C
	DALI Executive Standard	IEC 62386-101, 102, 207: DALI2.0
Testing Equipment	AC power source: CHROMA6530, digital power meter: CHROMA66202, Oscilloscope: Tektronix DPO3014, DC electronic load: M9712B, LED board, constant temperature and humidity chamber, lightning surge generator: Everfine EMS61000-5B, rapid group pulse generator: Everfine EMS61000-4A, spectrum analyzer: KH3935, hi-pot tester: TH9201B, stroboscope (percent flicker tester) 60N-01, etc.	
Testing Condition	Unless otherwise stated, the parameters of the power factor, THD and efficiency are the test results under the ambient temperature of 25°C and humidity of 50%, AC input of 230V and 100% load.	
Additional Remark	<ol style="list-style-type: none"> 1. It is recommended that customer should install protection devices for surge and for over & under voltage to ensure safety before connecting to electricity. 2. Make sure the AC power is disconnected and there's no electricity before using the DIP switch to adjust output current. 3. The PC cover, housing, end caps and other parts of the LED driver inside the LED light fixture must conform to UL94-V0 flammability standard or above. 4. As an accessory, the LED driver is not the only factor determining the EMC performance of the LED light fixture. The structure and the wiring of the light fixture are also relevant. Thus it's strongly recommended the LED light fixture manufacturer re-confirms the EMC of the whole LED light fixture. 	

Circuit Breaker & Relevant Parameters

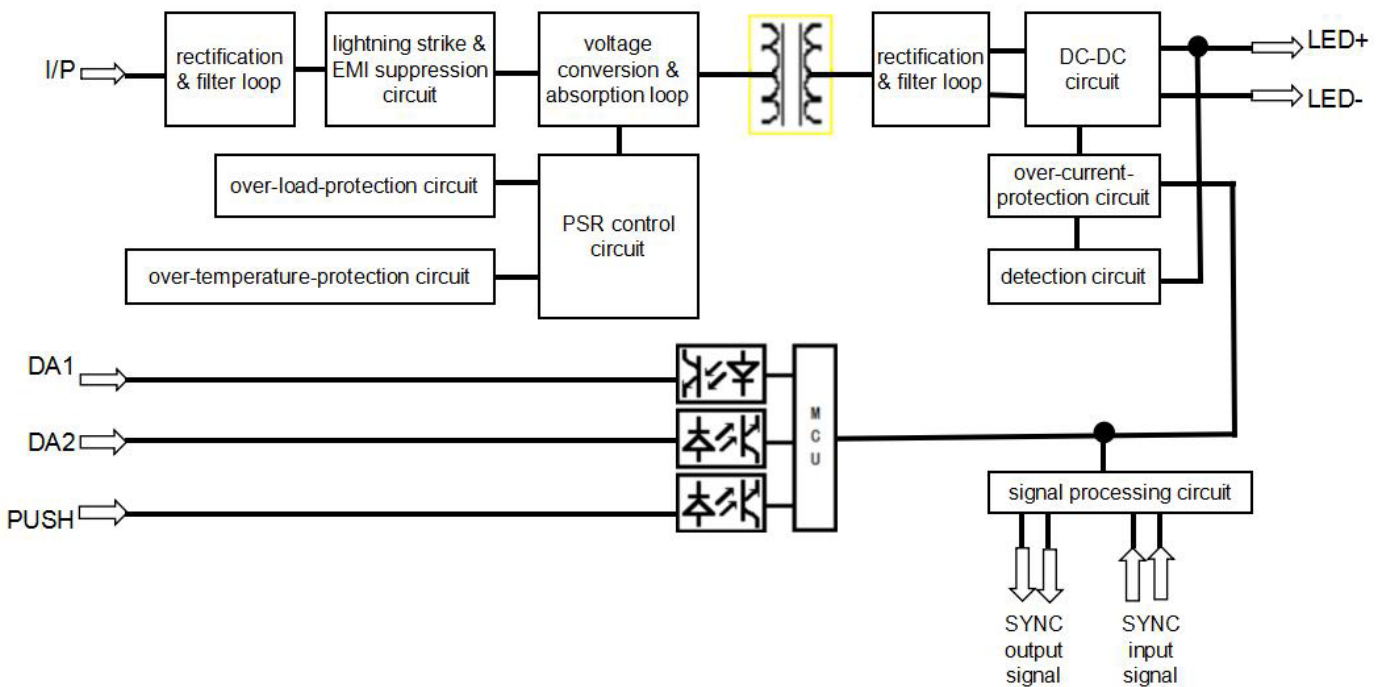

Name	Value	Remark
Surge peak current (I_{peak})	16.4A	Input voltage 230Vac
Surge half-peak time (T_{width})	73 μ s	Input voltage 230Vac. Measure the time for I_{peak} to drop to its half value.
Quantity of the same model driver that type-B 16A circuit breaker can configure.	51 pcs (max.)	

Driver quantities are below if use another type of circuit breaker.

type	rank	qty of accommodated drivers	relative conversion ratio
B	10A	32 pcs	63%
	13A	41 pcs	81%
	16A	51 pcs	100% (benchmark)
	20A	63 pcs	125%
	25A	79 pcs	156%
C	10A	53 pcs	104%
	13A	68 pcs	135%
	16A	86 pcs	170%
	20A	106 pcs	208%
	25A	132 pcs	260%

Function Diagram

DIP Switch Table

Ta	Vo DC	Current	1	2	3
50°C	25-42V	1050mA	—	—	—
		1000mA	—	—	ON
		950mA	—	ON	—
		900mA	—	ON	ON
		850mA	ON	—	—
		800mA	ON	—	ON

Remark: Apart from the noted ways of dial codes, the others are default 1050mA, the maximum current.

Dimension (unit: mm, tolerance: +0.5mm) & TC Spot

Wiring Diagram

Product Feature Curve

1. PF curve

The diagram below is about 1050mA load voltage and PF.

2. Efficiency curve

The diagram below is about 1050mA load voltage and efficiency value.

3. Lifetime curve

The curve below illustrates the driver's lifetime data when its case temperature in an airtight space reaches 40°C, 50°C, 60°C, 70°C, 80°C and 90°C.

4. Dimming curve

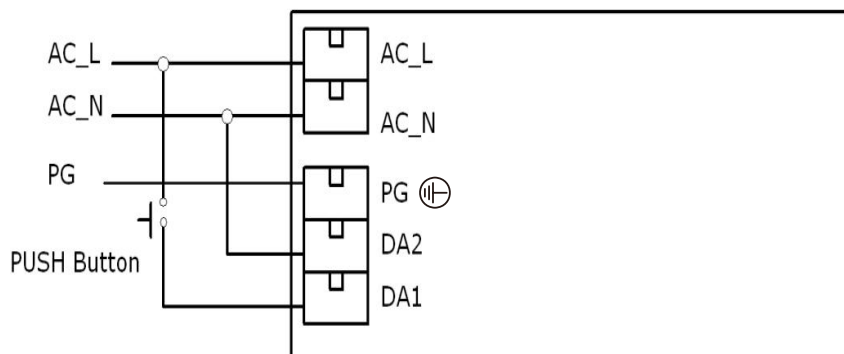

The diagram below is about 1050mA full load DC42V.

Output Current & Standard Error

Statement of Dimming Operation

1. Wiring diagram for PUSH dimming

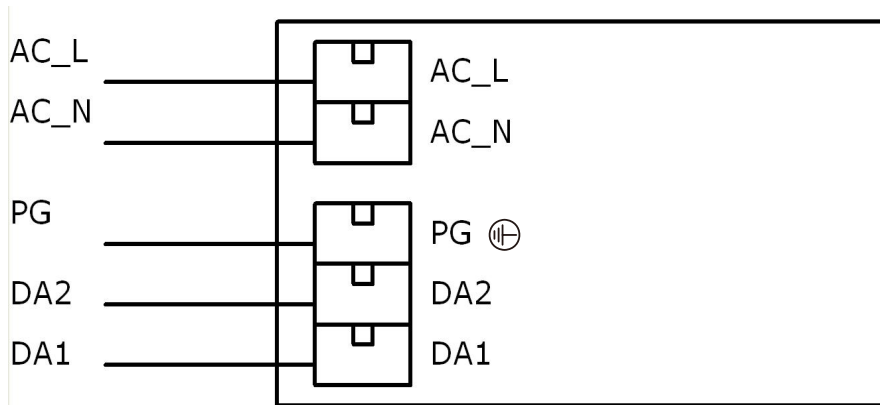

(1) PUSH dimming

Operation	Operation Time	Function
Instant Push	0.1 sec ~ 0.5 sec	Light On / Off
Long Push	0.5 sec ~ 10 sec	Brighter / Dimmer
Reset Push	> 11 sec	Back to the Brightest

- (2) Factory default setting is of 100% brightness.
- (3) The push operation won't cause any variation if it's less than 0.05 sec.
- (4) In DALI & PUSH mode, up to 64 pcs of power supplies can be connected in parallel.
- (5) The max. length of the wire from the button to the furthest LED power supply is 135m. Wire diameter: 16-22AWG.
- (6) The button can only be connected to the AC-L and DA1 terminals of LF-GSD040YE. Connecting to AC-N will cause short circuit. 
- (7) The minimum dimming depth of PUSH is 3%*Iout.

2. DALI dimming

- (1) Connect DALI signal to DA1 and DA2 terminals.
- (2) DALI protocol includes 16 group and 64 IPs.
- (3) The minimum dimming depth of DALI is 3%*Iout.

3. Dimming mode option

- (1) DALI dimming function and push dimming function cannot be executed at the same time, otherwise the DALI dimmer will be damaged.
- (2) After choosing push dimming function, connect the parts according to the relative wiring diagram. Disconnect DALI wires otherwise high voltage will go through DALI dimming system and burn DALI devices.
- (3) After choosing DALI dimming function, connect the parts according to the relative wiring diagram. Disconnect push dimming wires otherwise high voltage will go through DALI dimming system and burn DALI devices.

Attention

- 1. Use this product according to the specifications, please. Otherwise there may be malfunction.
- 2. Use luminaires that have not been certified or are not compatible with the drivers may cause fire, explosion or other hazards.
- 3. Man-made damage is not covered by warranty.
